of Correction

NOV 1 2006

REMARKS

The above-identified error in U.S. Patent No. 7,051,110 incurred through the fault of the U.S. Patent and Trademark Office, and each of the identified errors are clearly disclosed in the records of the Office.

In particular, the patentees request that White et al. (U.S. Patent No. 6,628,302) be included in the List of References Cited of the above-identified patent. In item 5 on page 2 of the January 7, 2005 Office Action, the Examiner referred to White et al. in rejecting claim 8. However, the Examiner failed to properly cite the White et al. reference on the Form PTO-892 attached to the January 7, 2005 Office Action.

Therefore, the patentees' representative contacted the Examiner to request that a corrected Form PTO-892 be issued that included the White et al. reference. In response, the Examiner faxed a corrected Form PTO-892 to the patentees' representative on February 7, 2005 in which the White et al. reference was properly cited. A courtesy copy of a facsimile cover sheet, corrected Form PTO-892 and the first page of the White et al. reference as faxed to the patentees' representative are submitted herewith.

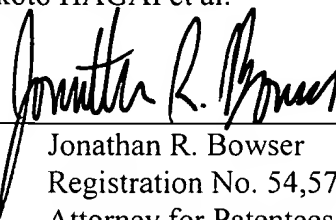

Accordingly, the White et al. reference should be identified in the List of References Cited in the above-identified patent, since this reference was cited by the Examiner and applied in rejecting a claim of the application resulting in the above-identified patent.

In view of the foregoing reasons, this Request is submitted under the provisions of 37 C.F.R. § 1.322, and a Certificate of Correction should issue at no expense to patentees.

Respectfully submitted,

Makoto HAGAI et al.

(57) **ABSTRACT**

An entertainment head-end provides broadcast programming, video-on-demand services, and HTML-based interactive programming through a distribution network to client terminals in subscribers' homes. A number of different features are provided, including novel user interfaces, enhanced video-on-demand controls, a variety of interactive services (personalized news, jukebox, games, celebrity chat), and techniques that combine to provide user experiences evocative of conventional television.
